

COATING Testing

Bending Coating Tester NOVOTEST BEND-H1519

The device for testing the elasticity and strength of the coatings during bending around a set of cylindrical rods, with diameters of rods from 1 mm to 20 mm.

NOVOTEST BEND-H1519 complies with **ISO 1519-73**, **ASTM D 522**, **ISO6860** which applies to paints and varnishes and describe by method for determining the elasticity of the film bending.

Bending Coating Mandrel Tester NOVOTEST BEND-H1500

The NOVOTEST BEND-H1500 is designed for determining the elasticity, adhesion, cracking of paint coatings on samples in accordance with **ASTM D 522-B**, **ASTM D 1737**, **AS/NZS 1580.402.1**, **BS EN3900-E1**, **DIN 53152**, **ISO 1519-1**, **NF T30-040**, **JIS K 5600-5-1**.
