

Elcometer 123 Surface Profile Gauge

The Elcometer 123 Surface Profile Gauge is an easy to use analogue gauge which measures the peak-to-valley height of a blast cleaned surface in a similar way to the Elcometer 223 and Elcometer 224.

STANDARDS:

ASTM D 4417-B, SANS 5772, SSPC PA 17,
US Navy NSI 009-32, US Navy PPI 63101-000

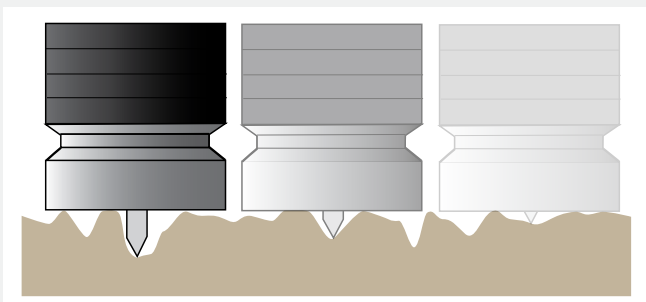

Technical Specification

C

Part Number	Description	Certificate
E123A--M-	Elcometer 123 Surface Profile Gauge, Metric	○
Range	0 - 1000µm (0 - 40mils)	Scale 2µm (0.1 mil)
Dimensions	105 x 55 x 25mm (4.1 x 2.2 x 1")	Weight 335g (8oz)
Packing List	Elcometer 123 Surface Profile Gauge, glass slide, 2mm allen key, carry case and operating instructions	

How to measure surface profile

1. Calibrate on a glass zero tile.
2. Ensure probe is 90° to substrate to ensure accurate readings.
3. Take a minimum of 10 readings over an area to establish the average surface profile.

○ Optional Calibration Certificate available.
