CARSCAN, ACTIVE THERMOGRAPHY TECHNOLOGY

ABOUT CARSCAN

CarScan is an international awardwinning, innovative and contactless method for examining the state of cars, other vehicles, boats and various carbon components. Among others, the CarScan method has won the prestigious award as the "Innovation of the year 2017!" by the German magazine "Auto Bild".

HOW DOES IT WORK

The method of active thermography, like most non-invasive measurement methods, is based on the stimulation of the measured object / material. CarScan technology is a combination of a photo-thermal measurement method that uses a **combination of light and thermal stimulation of the surface of the analyzed object**.

To capture data of light and thermal waves passing into and out of the material, we use a **high-performance IR thermographic camera** capable of capturing temperature modulations from the entire observed body surface at once. On the basis of taken images, the patented algorithm of CarScan software, performs amplitude and phase processing of the temperature path. Using the "Fourier Analysis" algorithm, each pixel is processed individually for each recorded image.

REPORT

<image>Image 0-200 micros

Datum: 21.11.18

When m

When measuring with Impulse stimulation we detect structural changes of inspected material are on the front and rear left doors.

Opinion:

CarScan technology uses ultra-sensitive IR camera to capture data by stimulating

the surface with a high-performance flash and halogen lights. Together with special

The report separately shows data for changes of material structure in two stages (up to 500 microns and over 500 microns). **The darker the colour in the picture, the thicker the structure of the measured material.** Based on the colour display, you can determine the extent of damage and repairs done on the vehicle. You receive a hard-copy and an e-copy of the report. Information included in the report you can

CARSCAN REPORT

PODATKI O VOZILU

software program it displays the results in a simple and transparent manner.

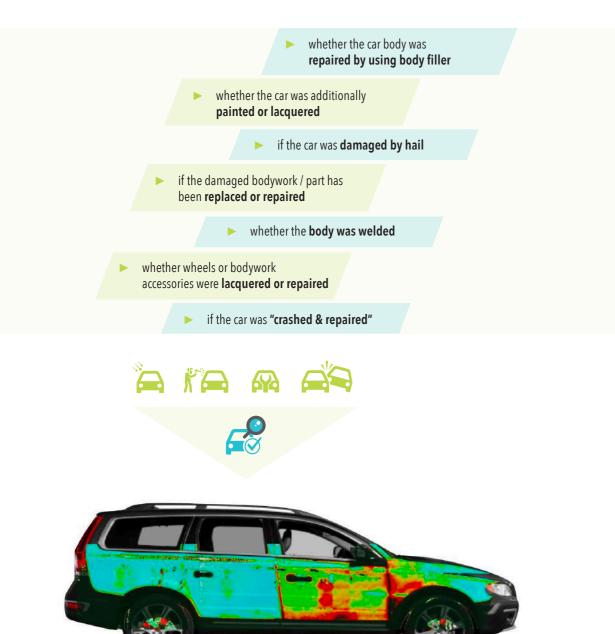

Damage repairs are up to 500 microns (0.5mm) deep. On the picture light blue collor shows original material. Crange-brown collor shows indicate application of non original material. Green collor shows smaller thickness of original material application. Dark blue collor shows smallest thickness of non original material application.

CarScan

CARSCAN TECHNOLOGY DETECTS

PROSPECTIVE CARSCAN **CUSTOMERS**

- » who before buying a car want to make sure about its actual condition. With the use of the report they can reduce the asked price or avoid purchasing "heavy repaired" car
- » who are selling a pre-owned car in a good condition and want to increase the bid price. Customers are willing to pay more for a well-preserved car

CAR DEALERSHIPS / CLASSIC CAR DEALERSHIPS

- who understand market value of the full-disclosure CarScan report. Full disclosure and transparency positively builds dealer's brand
- » to fully inspect trade-in cars to see their real state and value
- » to increase the value of the "well-preserved" cars
- » to use the report in dealing with skeptical customers
- » to use the report in dealing with problematic suppliers
- » to protect its good name in consignment sale
- » to determine actual state of vehicle in case where measurement by hand-held devices can not be carried out (newer cars are made from very different and complex materials)
- » to determine state of Classic cars / Oldtimers

INSURANCE COMPANIES

- » to detect fraud and establish the quality of repairs in the event of loss
- » for preventive check of high valued or rare cars, before insurance policy to customer is granted

LEASING COMPANIES

» to fully inspect and assess the potential damage of traded-in cars

COURT EXPERTS

» to provide help with expert opinions

OTHERS V

» all those who have been determining whether something is wrong on a certain part of the car with a classical, hand-held coating-thickness gauge and would rather want to obtain accurate information about the damage or repair that is hidden behind it

Dipl. Ing. Volker Carl is "The Father" of Thetascan and CarScan systems. Volker has been providing optical and infrared optical measuring services in the field of non-destructive material testing since 1999. Volker is also one of rare experts who is certified according to EN4179, Level III, i.e. for tests in the field of aerospace technologies. Because of his unique expertise Volker also trains the personnel at Airbus in Bremen.

Tomaž Mežek is Managing Director and co-owner of CarScan. Tomaž is an expert in Finance and Management and responsible for executive matters. He worked as CFO in a large manufacturing company.

Since he left the corporate business he gained experience in numerous Greenfield investments.

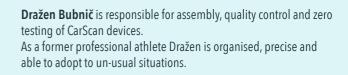

Franjo Radikovič is CarScan's Director of sales. His heart ticks for Innovation, technology and business development. Franjo is by profession a Mechanical engineer and has a degree in Direct marketing as well. Is co-owner of CarScan with a proven track-record in privately owned

and multinational companies.

Robert Pečan is responsible for input materials purchasing and logistics of CarScan devices. His entrepreneurial spirit is driving him to execute the tasks no matter how demanding they are.

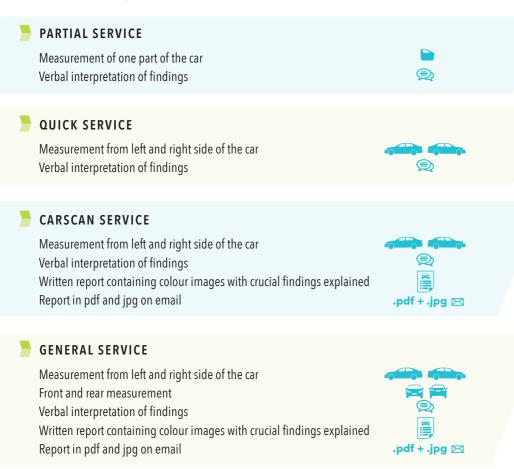

Katja Šivic is responsible for CarScans back-office. Has a Masters degree in organisational Sciences. Katja brings the female perspective to the company.

CARSCAN SERVICES

We market the following services:

DETAILED SERVICE

2
iined 📑
.pdf + .jpg 🖂

Normally Clients start with CarScan service and expand to General or Detailed service if findings require.

V ECO 2.0 MACHINE COMPONENTS

SCANNER

► Notebook:	Lenovo V320
► Camera:	IR Camera
Software:	CarScan
Dimensions:	800 x 800 x 1300 B x T x H
► Weight:	approx. 40 kg
Movement control:	stepper motor

GENERATOR

Power connection:	230 – 240 V / 10 A 50 Hz
Flash output:	6000 Ws (Factory settings 990 VDC)
Flash voltage:	max. 1000 VDC (Factory settings 990 VDC)
Fuse:	10 AM
Charging time:	6000 Ws approx. 15 seconds
Casing dimensions:	580 x 380 x 250 B x T x H
Weight:	23 kg
Scope of delivery:	1 x Generator G6000Z Special 1,5 m Power cord Sync cable USB cable

FLASH AND HALOGEN SYSTEM

Flash system:	1 x 6000 W, 230 Volt	
Weight:	approx. 4 kg	
Halogen system:	2 x 1500 W, 230 Volt	
Weight:	approx. 2 kg	

IR-CAMERA

Optical resolution:	382 x 288 Pixel
System accuracy:	\pm 2 °C or \pm 2%, the larger value applies
PC Interfaces:	USB 2.0
Ambient temperature:	0 70° C
Storage temperature:	- 40 85 ° C
Relative humidity:	20 - 80%, non-condensing
Casing (protection level):	IP 67 (NEMA 4)
► Shock / Vibration:	IEC 60068-2
Power supply:	via USB

DRIVER WITH BUILT-IN CONTROLLER

Multi-axis control

• Network (network converter)

Power Supply:	24/48 VDC
► RoHS Compliant:	These products do not contain substances that exceed the regulation values in the RoHS Directive.
Safety Standards:	CE
Protocol:	Modbus RTU Mode

STEPPER MOTOR

	Driver Voltage Input Power:	DC	D'e
	Туре:	Planetary Gear	
	RoHS Compliant:	CE	ATTEN IN CONTRACT
	Safety Standards:	EMC Directives	40
	CE Marking:	Class B	
	Ambient Temperature:	0 ~ 40°C (32 ~ 104°F) (non-freezin	ng)
	Ambient Humidity:	85% or less (Non-condensing)	
	Degree of Protection:	Motor: IP66. Gearhead: IP54	
•	Permissible Axial Load:	179.85 lb	

DIGITAL INPUT/OUTPUT MODULE Bidirectional, 55 ns

- BNC connectivity
- Individually configurable channel directions

ONE-SLOT BUS-POWERED USB

These specifications are for the NI cDAQ-9171 chassis only. These specifications are typical at 25 °C unless otherwise noted. For the C Series module specifications, refer to the documentation for the C Series module you are using.

ANALOG INPUT			
Timing accuracy:	50 ppm of sample rate		
Timing resolution:	12.5 ns		
ANALOG OUTPUT			
Timing accuracy:	50 ppm of sample rate		
Timing resolution:	12.5 ns		
DIGITAL WAVEFORM CHARACTERISTICS			
Timing accuracy:	50 ppm		
BUS INTERFACE			
USB specification:	USB 2.0 Hi-Speed		
	USD 2.0 HI-Speed		
POWER REQUIREMENTS			
Power consumption from USB:	5 V, 500 mA maximum		
Suspend mode:	2.5 mA maximum		
ENVIRONMENTAL			
Operating temperature (IEC-60068-2-1 and IEC-60068-2-2)	-20 °C to 55 °C		
Storage temperature (IEC-600068-2-1 and IEC-60068-2-2)	-40 °C to 85 °C		
 Operating humidity (IEC-60068-2-56) 	10% to 90% RH, noncondensing		
 Storage humidity (IEC-60068-2-56) 	5% to 95% RH, noncondensing		
 Pollution Degree (IEC 60664) 	2		
 Maximum altitude 	5,000 m		
Indoor use only.			

HAZARDOUS LOCATIONS

	U.S. (UL)	Class I, Division 2, Groups A, B, C, D, T4; Class I, Zone 2, AEx nA IIC T4
•	Canada (C-UL)	Class I, Division 2, Groups A, B, C, D, T4; Class I, Zone 2, Ex nA IIC T4
•	Europe (ATEX) and International (IECEx)	Ex nA IIC T4 Gc

SHOCK AND VIBRATION

To meet these specifications, you must panel mount the NI cDAQ-9171 system, use an NI locking USB cable, and affix ferrules to the ends of the terminal lines.

 Operational shock 	30 g peak, half-sine, 11 ms pulse (Tested in accordance with IEC 60068-2-27. Test profile
Random vibration	
► Operating	5 Hz to 500 Hz, 0.3 g _{rms}
Non-operating	5 Hz to 500 Hz, 2.4 g _{rms} (Tested in accordance with IEC 60068-2-64. Non-operating test profile exceeds the requirements of MIL PRF-28800F, Class 3.)

SAFETY AND HAZARDOUS LOCATIONS STANDARDS

This product is designed to meet the requirements of the following electrical equipment safety standards for measurement, control, and laboratory use:

- ▶ IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1
- EN 60079-0:2012, EN 60079-15:2010
- IEC 60079-0: Ed 6, IEC 60079-15; Ed 4
- ▶ UL 60079-0; Ed 6, UL 60079-15; Ed 4
- CSA 60079-0:2011, CSA 60079-15:2012

Note:

For UL and other safety certifications, refer to the product label or the Online Product Certification section.

ELECTROMAGNETIC COMPATIBILITY

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- ▶ EN 61326-1 (IEC 61326-1): Class A emissions; Basic immunity
- **EN 55011 (CISPR 11):** Group 1, Class A emissions
- ▶ EN 55022 (CISPR 22): Class A emissions
- EN 55024 (CISPR 24): Immunity
- AS/NZS CISPR 11: Group 1, Class A emissions
- AS/NZS CISPR 22: Class A emissions
- ▶ FCC 47 CFR Part 15B: Class A emissions
- ► ICES-001: Class A emissions

Note:

In the United States (per FCC 47 CFR), Class A equipment is intended for use in commercial, lightindustrial, and heavy-industrial locations. In Europe, Canada, Australia and New Zealand (per CISPR 11) Class A equipment is intended for use only in heavy-industrial locations.

Note:

Group 1 equipment (per CISPR 11) is any industrial, scientific, or medical equipment that does not intentionally generate radio frequency energy for the treatment of material or inspection/analysis purposes.

Note:

For EMC declarations and certifications, and additional information, refer to the Online Product Certification section.

$\textbf{CE COMPLIANCE} \ \textcircled{}$

This product meets the essential requirements of applicable European Directives, as follows:

- 2014/35/EU; Low-Voltage Directive (safety)
- 2014/30/EU; Electromagnetic Compatibility Directive (EMC)
- 2014/34/EU; Potentially Explosive Atmospheres (ATEX)

ONLINE PRODUCT CERTIFICATION

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/ certification, search by model number or product line, and click the appropriate link in the Certification column.
