### R, G, B, Hue, Saturation, Luminance

# COLOR ANALYZER Model : RGB-1002 ISO-9001, CE, IEC1010

## LILutron **RGB-1002** R G в COLOR ANALYZER POWER OP Function REL LIGHT RGBHLS ON / OFF Painting, Textiles, Paper Leather

The Art of Measurement

RGB/HSL value, no lighting material color analysis

### **COLOR ANALYZER**

#### Model : RGB-1002

#### 1. FEATURES

<ul> <li>* Relative function, can easy to compare the color value of the different two measurement material.</li> <li>* The RGB-1002 is designed mainly for measuring the color of no lighting sample such as textiles, paper, leathers, painting materials It is the useful tool for the quality control and the wide industrial application.</li> <li>* The color analyzer also can measure the reference lighting sample color value such as CRT, LCD monitor, LED lamp, lighting lamp</li> <li>* For no lighting sample color measurement, a defined light source illuminates the sample and the reflected surface light is spectrometrically analyzed.</li> <li>* For lighting sample color measurement, the light source of sample is spectrometrically analyzed directly.</li> <li>* RS232 computer interface, can store the measuring color value in the computer for recording and the further color analysis.</li> <li>* Build in CAL ( Calibration ) button, for no lighting sample measurement, use the included white color calibration card to make the self calibration easily.</li> </ul>	* The RGB-1002 is a portable color analyzer equipped with an external sensor probe having a 45° /0° color measuring geometry. The modem, accurate microprocessor technology uses the spectral analysis method to determine the color of the sample.	Meas
get the color value ( R, G, B or H, S, L ).       Accur         * Relative function, can easy to compare the color value of the different two measurement material.       Accur         * The RGB-1002 is designed mainly for measuring the color of no lighting sample such as textiles, paper, leathers, painting materials It is the useful tool for the quality control and the wide industrial application.       @ 2.         * The color analyzer also can measure the reference lighting sample color value such as CRT, LCD monitor, LED lamp, lighting lamp       Measi surface light is spectrometrically analyzed.         * For no lighting sample color measurement, a defined light source of sample is spectrometrically analyzed.       Measi samp materials         * RS232 computer interface, can store the measuring color value in the computer for recording and the further color analysis.       type         * Build in CAL ( Calibration ) button, for no lighting sample measurement, use the included white color calibration card to make the self calibration easily. #### 2. APPLICATION

* To check the color value of textiles, paper, leathers,
painting materials.
* The objective quality control of color during
production.
* The color measurement and recording of products
supplied by supplier to check for conformity
specification.
* The comparison of color samples against color
standard.
* The interpretation and statistic evaluation of color
sample measurement.
* To check the reference color value of CRT monitor,
LCD monitor, light lamp.
