

Penetrant Testing Process Guide

Method A: Water Wash Fluorescent

Method B/D: Post Emulsifiable Fluorescent

Five Tips for Penetrant Testing

1. Check required specifications before beginning penetrant inspection.
2. Certifications, SDS, PDS, and instructions are available at www.magnaflux.com
3. Verify that parts to be penetrant tested are clean and dry before applying penetrant.
4. Magnaflux offers PeneCert Testing Service for in-process penetrant materials. Contact Magnaflux Customer Service for details at support@magnaflux.com
5. Magnaflux penetrant products are available in kits for convenience and portability.

Method C: Solvent Removable, Fluorescent, and Nonfluorescent
